

Bowens QuickRing - Operating Instructions

The Bowens QuickRing with its EasyFlip 'D' Ring makes assembling softboxes quick & simple. Follow these instructions to get started.

1

Start by inserting a softbox rod into the socket on the right of the EasyFlip D Ring center socket. Position the Quickring so that, when complete, the lock lever faces out from the softbox.

2

Insert a second rod into the socket directly opposite the rod you inserted in step one. Then, insert a third rod into the socket directly across from the EasyFlip D Ring.

3

With the hinge 'open', insert the remaining softbox rod into the center socket of the EasyFlip D Ring.

4

Place your fingers on the underside of the EasyFlip D Ring and your thumbs on the top of the Quickring face. Squeeze the two rings together to lock your softbox QuickRing in place.

Bowens professional photographic lighting & accessories are available at all good photographic stores - worldwide! To find your nearest distributor, visit www.bowens.co.uk
